

REASONS WHY HIGH SCHOOL TEACHERS MISS OR DELAY TO ATTEND TO THEIR CLASSES

1 Problem statement

Currently there are no existing systems that monitor teacher activities while in school. Therefore this has been the major impact to the way teachers attend to their classes. Over the passed years, frequent reports have been raised by the class representatives reporting the increased rate at which teacher delay or miss classes.

2 Objectives

2.1 General objective

The intention of this research is to figure out how this practice can be put to an end and suggest ways of monitoring teacher activities while in school.

2.2 SMART objectives

Introducing class attendance registration systems for teachers: Primarily the system registers the teachers on their arrival to school and updates them with class schedules daily in order not to provide room for excuses.

Deployment of cameras in classrooms to monitor the teachers' class attendances (the time they enter and leave the classrooms). From the surveillances data can be kept to monitor the teaches who missed without filed reasons.
